

10.00 – 13.30, 31st of January, 2020

Human 3D Tissue Models

for Hazard Assessment and Cancer Research

Overview on ongoing research activities at the Adolphe Merkle Institute (AMI), University Fribourg

9.30 – 10.00

Registration and coffee/tea

10.00-10.10

Dr. Markus Riman, TEDD Competence Centre

Prof. Barbara Rothen-Rutishauser, AMI

Welcome

10.10-10.30

Irini Dijkhoff, ‘Simulating the impact of diesel exhaust particles on human skin.’

10.30-10.50

Manuela Estermann, ‘3D omentum model designed by bioprinting technology to study ovarian cancer spreading.’

10.50-11.10

Dr. Roman Lehner, ‘A 3D intestinal model to study potential adverse effects of microplastic on human health.’

11.10-11.30

Hana Barosova, ‘3D human alveolar models to assess adverse effects upon exposure to aerosolized particles.’

11.45-12.15

Tour of laboratories

12.15-13.30

Lunch

Photo: Sven Bachmann

Venue

- Adolphe Merkle Institute
Chemin des Verdiers 4
Fribourg, Switzerland
- <https://www.ami.swiss/>
- Limited visitor parking places available

Registration

- TEDD members free, Others CHF 50
- Limited to 25 participants
- Registration deadline 17th of January, 2020
- [Register here](#)

Funders and organizers

This event is organized by TEDD Competence Centre Switzerland and the Adolphe Merkle Institute. Presented research has received funding from the Adolphe Merkle Foundation, BASF, the Swiss National Science Foundation under Sinergia grant no. CRSII5_171037/1, and two European Union's Horizon 2020 research and innovation programmes, under the Marie Skłodowska-Curie grant agreement no. 765602 and no. 760813.
